

WEBINAR: *Two Line-side Labeling Solutions for "Human-proof" Processes*

Date: Tuesday, December 9, 2008

Time: 2:00 ET (11:00 am PT)

DESCRIPTION:

- Having problems with mis-labeled parts?
- Still pre-printing labels in batches?
- Need a more efficient labeling process?

Honda has announced a new supplier initiative called “Line-side Labeling” to eliminate its problem of receiving mis-labeled parts from suppliers.

[Join this 30-minute session](#) to learn what Line-side Labeling is, and how it can increase the accuracy and efficiency of your parts-labeling process.

You’ll see two unique solutions that are so accurate and easy-to-use, we call them “human-proof”.

These solutions ensure:

- The right label always goes on the right part
- The label data is always current
- The label format is always correct

You don’t have to be a Honda supplier to get the benefits of Line-side Labeling!

AGENDA:

1. What is “Line-side Labeling”?
2. Benefits of Line-side Labeling over other labeling processes
3. Two “human-proof” Line-side Labeling solutions:
 - Push-Button Labeling: Ideal for work cells where the production machine makes a single Part Number
 - TouchScreen Labeling: For work cells where the production machine makes several Part Numbers at one time
4. Typical Solution Costs
5. Q & A
